

— GOOGLE WORKSPACE AUTOMATION

CAKE ORDERS, CLEAR FROM REQUEST TO DELIVERY.

A working prototype that keeps order details in Google Sheets and adds confirmed pickup or delivery times to Google Calendar.

 Google Sheets Apps Script Google Calendar

— MASTER ORDER TRACKER

Every order starts in one clear tracker.

The team can update orders without learning a new tool. Required fields keep the data ready for automation.

 All Orders

FICTIONAL DEMO DATA

ORDER	CAKE DETAILS	DUE	FULFILLMENT	BALANCE	STATUS
CK-1048	Vanilla berry · 3 tier	18 Jun · 2 PM	Delivery	Paid	Confirmed
CK-1049	Chocolate · 8 inch	19 Jun · 10:30	Pickup	\$45	In progress
CK-1050	Red velvet · 24 pcs	20 Jun · 4 PM	Delivery	Paid	Ready
CK-1051	Lemon · 10 inch	21 Jun · 12 PM	Pickup	\$75	New
CK-1052	Carrot · 2 tier	22 Jun · 1:30	Delivery	\$130	In progress

Required fields

Order ID, date, delivery type, and status are checked before sync.

Clear status

New, in progress, confirmed, and ready orders are easy to scan.

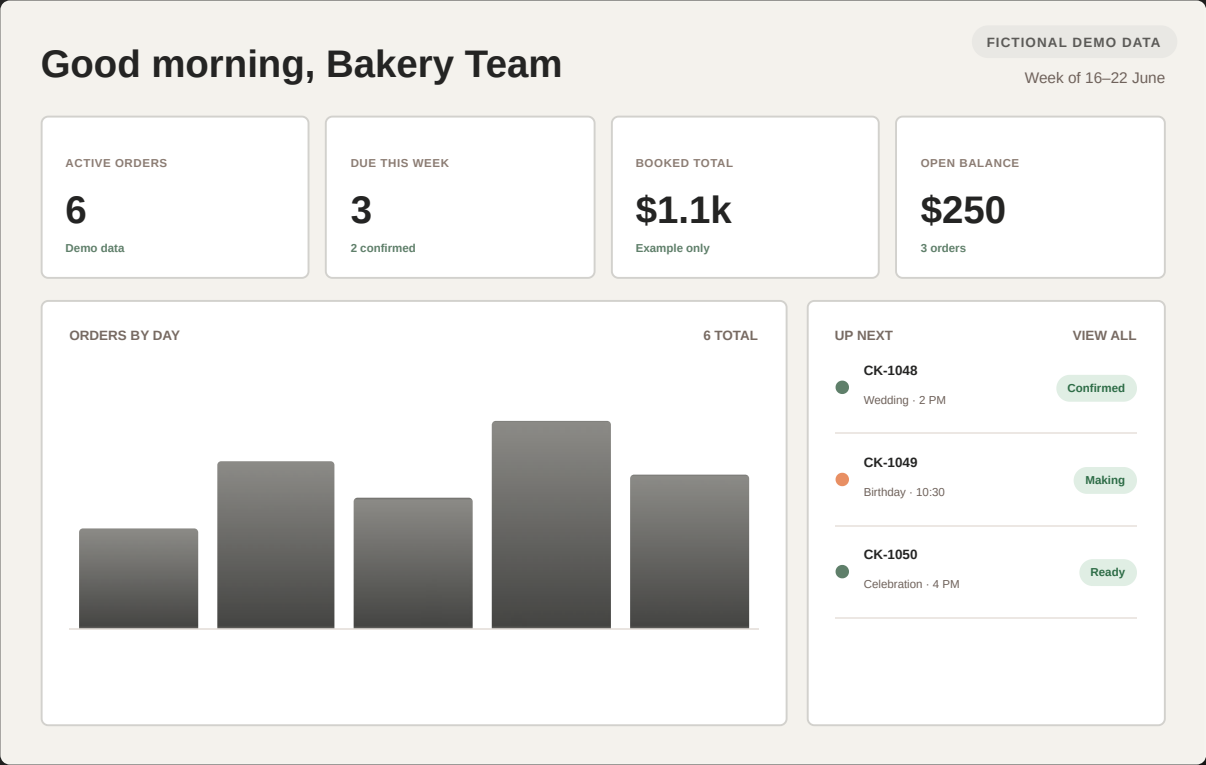

Payment view

Total and remaining balance stay next to the order details.

— DAILY DASHBOARD

A simple dashboard turns order rows into a useful view for planning the week.

See what needs attention today.

- Know what is due

Upcoming pickup and delivery times stay visible.
- Spot open balances

The team can follow up before handoff.
- Plan production

Current status shows what needs work next.

— CALENDAR AUTOMATION

Confirm an order. Get a scheduled event.

Apps Script creates a new calendar event or updates the existing linked event.

June 2026

Working week · demo data

	MON 16	TUE 17	WED 18	THU 19	FRI 20
9 AM		Prep · CK-1048		Pickup · CK-1049	
12 PM			Delivery · CK-1048		
3 PM					Delivery · CK-1050

AUTO-CREATED

Delivery · CK-1048

🕒

Wednesday, 18 June

2:00 PM delivery

📦

📍

Delivery location

Address is included when available

🔄

Linked to one order row

Stored event ID supports later updates

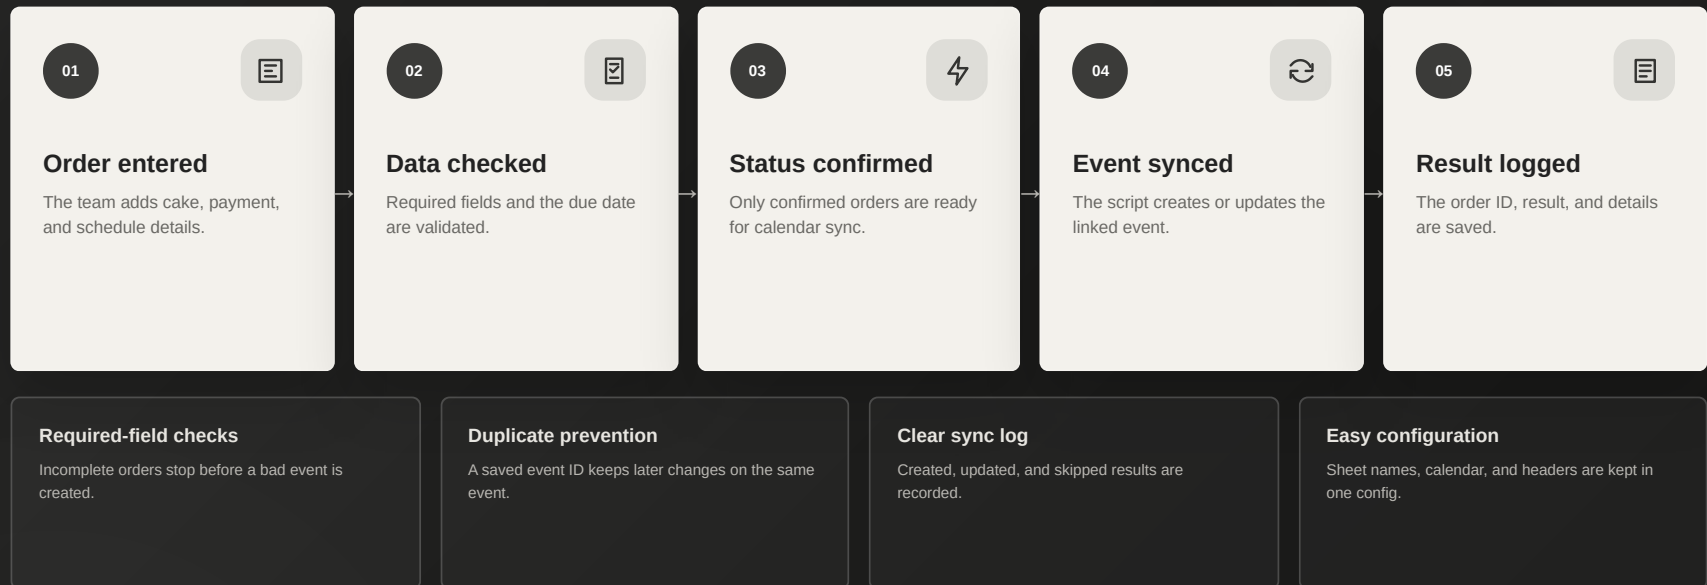

GOOGLE CALENDAR SYNCHRONIZATION

CREATE ONCE · UPDATE SAFELY · KEEP A RECORD

— AUTOMATION WORKFLOW

The workflow is short enough to understand and careful enough to avoid duplicate events.

The script handles the repetitive steps.

— WORKING PROTOTYPE

Simple tools, connected for daily work.

The solution stays inside Google Workspace and can be adjusted to match a real bakery process.

CAPTURE

Google Sheets

- ✓ One order tracker
- ✓ Clear status and balance
- ✓ Familiar team workflow

AUTOMATE

Apps Script

- ✓ Required-field validation
- ✓ Create or update logic
- ✓ Saved event IDs
- ✓ Readable sync results

SCHEDULE

Google Calendar

- ✓ Pickup and delivery time
- ✓ Order summary
- ✓ Address and notes

CODE PROOF

```
if (status === "confirmed")  
  syncOrderRow_(sheet, row);  
  
log_(orderId, result, detail);
```
